

In The Specification:

Please replace the paragraph on page 14, lines 12 through 18 with the following paragraph:

In the FIG. 3 embodiment, download module 322 may preferably download and install appropriate application software 312 and other software for use at a particular event or event location. Download module 322 may also initially determine whether a version of the application software 312 or other software already exists on user device 114, and may then perform an update procedure if the current version of application software 312 or other software is outdated.

Please replace the paragraph on page 15, lines 9 through 15 with the following paragraph:

In the FIG. 3 embodiment, game module 332 may include any appropriate type of interface for utilizing user device 114 to participate in one or more game services on event server 138. User communication module 334 may preferably be utilized by a system user of user device 114 to selectably communicate with other game participants through their respective user devices 114. For example, user communication module 334 may support communications by text messages or by audio headset.

Please replace the paragraph on page 20, lines 9 through 18 with the following paragraph:

In the FIG. 6 embodiment, upload module 622 may preferably provide appropriate device application software 312 (FIG. 2) or other software for use at a particular event or event location to user device 114. In the FIG. 6 embodiment, profile manager 624 may preferably manage and utilize one or more user profiles 412 that may be transmitted to event server 138 during a login procedure. Profile manager 624 may also maintain a list of one or more location profiles that each correspond to a particular event location. Event server 138 may preferably utilize the location profiles in conjunction with location information 416 (FIG. 4) from a user device 114 to provide appropriate server content information to a user device 114.
